

# Conquering Your Security Risks

## Form Alliances

Regularly inform your commanding officers of potential risks.

Ensure alignment of IT priorities and budget requirements according to your latest intel updates.

## Take Inventory

Document your assets.  
Identify and classify your data.  
Then establish appropriate defenses.

Do you know where your sensitive data is stored and how it is managed?

## Know Your Threat Landscape

Be on watch for attacks.  
Know what tactics criminal groups use in your industry.  
Obtain intelligence reports like the HALOCK Industry Threat (HIT) Index to understand potential dangers.

## How to Win

Mitigate your risks with a **Duty of Care Risk Analysis (DoCRA)** approach to establish reasonable safeguards. This comprehensive strategy incorporates the essential players by taking into consideration your specific mission, objectives, and obligations. Through DoCRA, you protect your business mission, meet compliance requirements and demonstrate reasonable security that is appropriate for all interested parties.

HALOCK's Risk Management Program leverages DoCRA while providing you with a GRC arsenal of a SME security team, intellectual property, and the *Reasonable Risk* platform. Learn more at [www.halock.com](http://www.halock.com).
