

PROTECT OUR PATIENTS

KEEP THEIR INFORMATION CONFIDENTIAL AND
CARE SYSTEMS SAFE

An Ounce of Prevention is Worth a Pound of Cure...

Check for Vital Signs

Keep an eye out and report any suspicious activity.

If you see something unfamiliar, it could be a sign that your access has been compromised.

Keep Clean

Be careful where you click and what you download.

Only trustworthy sources should be accessed, or you may spread a computer virus.

Avoid Memory Lapse

Always log out before you leave your workstation.

Protect patient data and the medical network by keeping it secure.
