

THE GREAT RISKS

Is it Real?

Before you download that attachment, validate the source of an email. Sometimes a rogue email can slip into your inbox that appears legitimate, but could launch malware onto your system if you engage.

Malicious Simulation.

Be aware of any glitches cyber criminals may throw your way to steal your sensitive data. They can pose as anyone in an email. Confirm it is really your CFO asking you to update bank account information. Call your manager if 'HR' is asking for your personal health information.

THEY'VE BEEN WATCHING YOU.

HACKERS CAN SIMULATE A REALITY TO GET YOU TO DO WHAT THEY WANT. THE THREATS ARE VERY REAL.
DON'T LET BAD ACTORS USE YOU AS A SOURCE OF POWER AND MONEY.

BE THE ONE WHO PROTECTS YOUR NETWORKS.
