

# STRANGE LINKS

## Mind Games

Hackers will play with your mind by sending you fake emails pretending to be your boss.

Check the source of the email before you click or transfer funds. Verify anything suspicious.

- Follow security policies.
- Log out when leaving your workstation.
- Don't click on strange links.

## Data Breach = Power Loss

In the event of an attack, know your incident response plan (IRP). Is your Extended Detection and Response (XDR) implemented in order to control the situation? Be sure your Data Loss Prevention (DLP) is tuned to alert the right teams.

**Timing is everything.**

Cyber threats lie in wait, looking for a vulnerability to exploit.

Take the time to get the right tools and controls in place.

If you rush through processes, you may end up

UPSIDE DOWN.

**HALOCK®**
