

CONGRATULATIONS!

WORLD'S BEST SECURITY AWARENESS! GREAT JOB, EVERYBODY!

Believe in yourself

I like to encrypt too! Encrypting is my favorite!

Just like wrapping gifts, wrap your data in layers of encryption with a VPN to keep it safe and sound from cyber criminals who belong on the naughty list.

Does someone need to debug?

Code of elves: Keep your systems up-to-date and patch your software regularly to secure any potential vulnerabilities.

The best way to spread malware is clicking without care.

Son of a nutcracker! Don't trust every link that you see; make sure that you know the sender. Hover over links to check the url destination before clicking.

They sit on a throne of lies.

Emails from your favorite stores should never ask for sensitive personal information. Check sender details before spreading holiday cheer with your credit card.
